IFB FOR CABLING TECHNOLOGY
CERTIFICATION TRAINING PROGRAMS**

AMENDMENT #2

VENDOR QUESTIONS

1). IFB Section 4.1, Page Number 4 - “Off-site training for instructors within a 30-mile radius of the determined correctional facility along with on-going professional development and technical support, as needed.” I’m assuming this would be training for our instructor entering the facility?

The off-site training for instructors is any training required by the vendor for an instructor to become qualified/certified to teach the cabling technology certification program. Training (for instructors) required by the Agency is conducted on-site at the correctional facilities.

2). IFB section 4.1, Page Number 4 - “What approvals are required to have the needed tools and equipment brought into the prison. If approval is required what is that process for the approval?

The minimum equipment from the selected vendor will become property of MDOC. If any additional equipment is required for training purposes, it must be pre-approved by the facility superintendent or designee.

3). IFB Section 4.1, Page Number 4 - Curriculum that addresses various learning styles... Can you elaborate on what learning styles would be appropriate?

The curriculum should provide opportunities for inmates to learn through visual, auditory, linguistic, and kinesthetic modes.

4). IFB Section 4.1, Page Number 5 - “Minimum continuing education units/professional development hours needed to maintain instructor qualifications to teach”. Is this question in reference to our instructors?

The minimum continuing education units/professional development hours needed to maintain instructor qualifications will be based on the selected vendors requirements for the instructor to provide the cabling technology training to students.
