Building Brighter Futures One Certification at Time

LAMBERT – In partnership with Coahoma Community College, 25 participants at the Quitman Community Work Center completed Forklift Training on Friday, March 6.

They gained valuable hands-on skills that will help prepare them for employment opportunities upon reentry.

This certification not only equips participants with industry-recognized skills but also strengthens their confidence and readiness to enter the workforce.

Programs like this are an important part of MDOC's commitment to reducing recidivism and creating pathways to meaningful employment.

The MDOC appreciates the partnerships and support that help make training opportunities like this possible. Together, we are building brighter futures—one certification at a time.
