Kemper Regional Prison Reinforces Rehab Mission

DEKALB – Kemper County Regional Correctional Facility is highlighting inmates' successful completion of the Alcohol & Drug (A&D) Program and Reintegration Program.

Both programs reflect discipline, growth, and a commitment to change. As shown at the March 17, 2026, graduation, participants engaged in structured training focused on life skills, decision-making, employment readiness, financial responsibility, and planning for successful reintegration.

From classroom instruction to real-life application, the individuals are leaving better prepared to transition back into society with purpose and direction.

Warden Byron Walker continues to prioritize programming that promotes accountability and opportunity, showing strong leadership, said Derrick Chambers, who manages the regional program for the MDOC. "The MDOC also recognizes Sheriff James Moore for his continued partnership and support in strengthening outcomes that benefit both the facility and the community."

"Moments like this reinforce MDOC's mission to move individuals from incarceration to transformation while enhancing public safety across Mississippi," Chambers said.
