

CDL Simulator Arrives at Mississippi State Penitentiary

PARCHMAN -- Mississippi State Penitentiary, Unit 25, welcomes this incredible hands-on learning experience.

The CDL Simulator provides participants with realistic driving scenes, road conditions, and scenarios designed to prepare them for real-world commercial driving.

This is more than a simulator. It is another opportunity to provide meaningful education, workforce preparation, and a marketable skill participants can carry with them upon release.

"At MSP, we believe that rehabilitation includes providing individuals with the tools, training, and opportunities needed for a successful second chance," said MSP Education Director Kimberly Meeks. "Every new skill learned today can open another door tomorrow."

A special thank you to Deputy Commissioner Kelley Christopher, Chief Superintendent Marc McClure, and Deputy Warden-K9 Sanders for helping transport this big rig to Parchman Farms and making this opportunity possible.
