Number of buildings: Auditors should count all buildings that are part of the facility, whether inmates are formally allowed to enter them or not. In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house inmates, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.	1
Number of inmate housing units: Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house inmates of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows inmates to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.	4 dormitory/8 seg cells

Audit Findings

Audit Narrative

The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.

The Alcorn County Correctional Facility is compliant with all applicable PREA Standards.

The on-site PREA audit of the Alcorn County Correctional Facility audit was conducted July 19-20th, 2019 by Department of Justice Certified Auditor Michele Dauzat. The purpose of this audit was to determine the facility's degree of compliance with the Federal Prison Rape Elimination Act Standards. The site review was led by Ed Hargett, Warden Josh Davis, Chief Wilburn, Christy Garrett, Admin., Dana Talley HR, and PREA Compliance Managers Marcilla Elliott and Tina Blackwell. Prior to the onsite portion of the review, the facility PREA Compliance Manager provided the auditor with the PREA Pre Audit Questionnaire which included all policy and facility documentation relevant to each PREA standard for review. Following review of the documentation and in preparation for the onsite visit, the auditor and the Compliance Manager engaged in ongoing contacts concerning the additional documentation needed for review.

The Notice of the Audit was posted throughout the facility prior to the scheduled Onsite Audit Phase. The PREA Compliance Manager reported the notice was posted in all housing areas, visitation and programming areas. The flyer explained the purpose of the audit and provided offenders and staff with the auditor's contact information.

The Mississippi Department of Corrections (MDOC) has developed a network of contracts with local governments to manage Regional Correctional facilities (RCF) that house inmates with lower custody level designations. It requires all Regional County Facilities, as well as all private prisons, to adopt and comply with their established and detailed PREA policy. The MDOC PREA policy is directly compatible with acceptable PREA Standards and promotes uniformity through-out the state.

The Mississippi Department of Corrections Policy, which all RCFs must follow, is SOP 20-14-01. The facility also has a detailed, facility specific policy for PREA, both policies and procedures are totally aligned with PREA National Standards.

All inmates at this Regional Correctional Facility are adult male offenders that have already been processed through the state reception unit. This facility does not house female or youthful inmates. The RCFs also do not house inmates with specific, special issues, such as medical, disabilities, language barriers and/or immigration proceedings.

The use of RCFs for lower security inmates and those nearing release also includes the transfer of special-needs inmates back into a larger State prison if the need for special services arises.

Pre-Audit Phase preparation included a thorough evaluation of all documentation and materials submitted by the facility along with the data included in the Pre Audit Questionnaire. In addition, the Prea Compliance Manager also sent documentation regarding the facility training curriculum, educational material, staffing plan, unit register, organizational chart, etc.. The Mississippi Department of Corrections (MDOC) maintains a policy regarding Sexual Abuse and Response and the Alcorn County Correctional Facility maintains a facility specific policy as well as adhering to MDOC policies.

An entrance meeting was held July 19, 2019 at 8:00 a.m., in which the auditor and leadership staff met and conducted an onsite review of the facility. Following the entrance meeting, the auditor began the site review. This included an observation of the facility configuration, staff supervision of inmates, housing units, segregation units and programming areas. Informal interviews were conducted with both staff and inmates while in the various areas of the facility. While on the site review, the auditor was permitted access to all areas of the facility. During the site review, camera placement and staff placement were reviewed to determine standards compliance. Privacy in bathroom area was inspected to include any areas with barriers. Staff were aware of the requirement to announce the presence of the opposite gender and notification of such notice is posted on pod doors. Interviews with inmates and staff supported that the facility does ensure these announcements and that this practice is adhered to during daily operation.

It was obvious that staff and inmates receive appropriate training concerning PREA. The facility implements a zero tolerance policy and conducts training upon hire as well as annual and regular refreshers. When interviewed, staff were fully aware of their responsibilities in reporting sexual abuse, sexual harassment, staff negligence and retaliation for reporting. When questioned about responder duties, staff was familiar with their duties to protect victims and each staff member could vocalize the procedure for evidence preservation.

The facility utilizes roving staff to make random checks. The housing areas had clear lines of sight for officers and there were no noted blind spots. The camera system has excellent clarity and detail, enhancing the security of the inmate housing zones. It should be noted that upper management staff has twenty four hour access to view video monitoring, even when offsite.

Searches are conducted by same sex staff with the normal exception for exigent circumstances, which have not yet occurred. Male staff are available on all shifts to conduct strip searches when necessary and this was verified during interview of both staff and inmates.

Several staff and inmates were interviewed and acknowledged receiving training for reporting sexual abuse and harassment and the right to be free from retaliation. All inmates were aware of the phone number for reporting and many verified that higher ranking staff including the Warden and Chief of Security make frequent rounds throughout the facility. Unannounced rounds are documented in the unit register which clearly indicates when a supervisor or high ranking official enters and exits the area.

If an incident occurs, Magnolia Medical Center would provide the forensic exams. During the review, it was noted that the on-site nurse is involved in providing screening upon intake. The nurse asks questions regarding victimization and educates the inmate on reporting procedures.

Pre-Onsite Audit Phase

Prior to the onsite review to the facility, the auditor requested a list of inmates, staff, volunteers, and contractors who would be interviewed for specialized and targeted interviews. From these listings, once on-site, the auditor selected representative samples for interviews (i.e., inmate and staff) and document reviews during the onsite portion of the audit. The listings requested by the auditor in the pre-onsite audit phase included:

Complete inmate roster of population on the first day onsite.

Youthful inmates- None at this Facility

Inmates with disabilities- One hearing impaired, one vision impaired, one developmentally delayed

Inmates who are Limited English Proficient (LEP)- One

Lesbian, Gay, Bisexual, Transgender and Intersex (LGBTI) Inmates- One inmate identified as Gay

Inmates in segregated housing- None at this Facility
Inmates who reported sexual abuse- None at this Facility
Inmates who reported sexual victimization during risk screening -None at this facility

Complete staff roster (indicating title, shift, and post assignment)
Specialized staff, particularly:
Intermediate- or higher-level facility staff responsible for conducting and documenting unannounced rounds to identify and deter staff sexual abuse and sexual harassment
Medical staff
Administrative (human resources) staff
Volunteers who have contact with inmates
Criminal investigative staff (e.g., at agency level, facility level, external entity, etc.)
Administrative investigative staff (e.g., at agency level, facility level, external entity, etc.)
Staff who perform screening for risk of victimization and abusiveness
Staff who supervise inmates in segregated housing
Staff on the sexual abuse incident review team
Designated staff member charged with monitoring retaliation
First responders, security staff who respond to an incident of sexual abuse
Intake staff

All incident reports from the 12 months preceding the audit
All allegations of sexual abuse and sexual harassment reported for investigation in the 12 months
Total number of allegations was zero

In reviewing the targeted inmate categories recommended by DOJ for interviews, there were very few categories of inmates that were housed at ACCF. Inmates with any presenting issues and or vulnerability concerns would be transferred to a DOC facility and not be housed in the Regional Correctional Facility environment.

INTERVIEWS

Staff

Staffing pattern is consistent and an on-call process is utilized to fill any vacancies. Currently they have a total of 38 staff, including 25 full time correctional officers, 4 support, 1 program staff and 1 other.

A total of 36 staff were interviewed during the course of this audit. Staff interviews consisted of:

- 1 Agency Head Designee
- 1 Agency PREA Coordinator
- 1 Warden
- 1 HR/Administrative Manager

2 Investigator, Sheriff's Department and facility certified

- 1 Volunteer Supervisor/Chaplain
- 1 Medical (Nurse)
- 2 PREA Compliance Manager
- 1 Retaliation Monitor
- 1 Intake
- 2 Intermediate/High Level Security Supervisor
- 1 Staff Who Perform Screening for Risk of Victimization
- 3 First Responder Staff (Line)
- 3 Incident Review Team Members

MINIMUM 12 Random Staff interviews 15

Many of the specialized staff of the facility, serve in multiple capacities/roles, due to the overall limited amount of staff. Staff were able to articulate their role in their PREA responsibilities, such as reporting, responding and evidence preservation. All security staff are trained First Responders and they appeared to be diligent in their responsibility to protect the inmates from harm.

SAFE or SANE certified staff are available through the local Magnolia Medical Center, which the facility uses.

Inmate

The auditor conducted the following number of inmate interviews during the onsite phase of the audit:

Thirty random inmate interviews were conducted during the on-site visit. There was one inmate self-reported as LGBTI who was interviewed. Two inmates with a physical disability and one inmate with a cognitive disability were interviewed. There were no inmates reporting sexual abuse at the facility and no inmates had been segregated at any point for any sexual abuse-related issue, either for investigation, separation or protection.

Inmates interviewed indicated that they have received training in PREA and PREA related documents (handouts and pamphlets). Several inmates mentioned the postings with reporting phone number without being prompted. Inmates admitted they felt safe and considered the possibility of sexual abuse, unlikely. They also indicated that they believed staff would take complaints seriously and thoroughly investigate.

Facility Characteristics

The auditor's description of the audited facility should include details about the facility type, demographics and size of the inmate, resident or detainee population, numbers and type of staff positions, configuration and layout of the facility, numbers of housing units, description of housing units including any special housing units, a description of programs and services, including food service and recreation. The auditor should describe how these details are relevant to PREA implementation and compliance.

The Alcorn County Correctional Facility is located in Corinth, Mississippi about 50 miles north of Tupelo, MS and approximately 97 miles east of Memphis, TN. Opened in September 2011, the facility is owned and operated by Alcorn County, but is required to comply with the Mississippi Department of Corrections' mission and policies, as they house state offenders. The facility is in good condition and is well maintained and sufficiently staffed. The ACCF Warden is selected by the Sheriff and approved by MDOC to manage the Correctional Facility. The facility is a single, story building. All operational and program areas of the agency are accessible from entry inside the single, story building. Recreation attendance requires exiting the building into a secure perimeter area which is supervised by staff and cameras providing full video monitoring coverage. Audit postings were available in multiple areas and viewed throughout the facility during the site review. Segregation cells are only utilized for emergency and temporary placement. In the event used, the inmate would be under security monitoring until the inmate could be transferred to an MDOC facility for appropriate housing and treatment. Staff conduct regular documented rounds of this area.

This is a medium custody facility operated by Alcorn County for contracted Mississippi State DOC adult male prisoners who have been screened thoroughly. It contains six, sixty-man zones or pods for a capacity of 360 male inmates. Each pod has five toilets and ten showers. There are two towers or control rooms, the front one covers pods E & F and the back one covers pods A, B, C, and D. There are eight single cell segregation cells which contain a shower in each cell, a dining hall that is used for programs and visitation. There is a large recreational yard approximately 6600 square feet of covered area for appropriate for all weather use.

The Administration portion of the facility holds property storage, laundry, kitchen, medical, Barber, Chaplain, Commissary and all administrative offices. There are separate showers and lockers for male and female employees as well as a break room for all staff. The Administrative portion of the facility is 16,300 square feet making the Regional Jail Facility a total of 48,700 square feet.

Upon entrance into the facility, you are greeted by staff within the lobby where further access into the facility is restricted pending approval for entry. Case Managers, security staff, security staff supervisors and inmate housing unit/program areas are located in the rear of the facility. All Administrative offices and attorney visitation rooms are located in the front of the building. The dining hall also serves as a multipurpose area for various programming to include religious programs, visitation, staff meetings, classroom and property distribution.

During the site review, the facility was noted as being very clean, sanitary and secure. The forty-six cameras provide excellent clarity and limits the number of blind spots. The Housing areas are monitored through use of the cameras and random, irregularly scheduled rounds from roving personnel. In the event of a suicidal inmate, staff would provide one on one supervision until transferred.

An additional advantage of the ACCF is that the facility's manageable size contributes to a safer environment for the inmates. Additionally, many of the inmates are lower security as they near their release and problems are few, and staff responds to those few quickly.

The facility's efforts in the area of privacy in the bathroom areas are appropriate and commendable. Curtains are strategically positioned to allow visibility at the top and bottom on the shower area, while still providing appropriate privacy. Barriers were added to toiletry areas to provide privacy that works effectively. In areas where camera coverage is limited, staff presences is constant.

Conclusion

Upon concluding the on-site portion of the audit, an exit meeting was held with with Warden Josh Davis and PREA Compliance Managers Tina Blackwell and Marcilla Elliot. The auditor reviewed the findings and all recommendations that were made. The auditor advised them she would be available as a resource at any time if necessary.

The MDOC PREA Coordinator and the facility PREA Compliance Managers are familiar and well-versed in their responsibilities to facilitate compliance with the PREA standards. The facility Compliance Manager indicated that she has the authority and ample time to coordinate the facility's mission of full PREA compliance.

Most of the those interviewed (staff and inmates) noted the commitment to PREA of both Warden Davis, Chief Wilburn and both compliance managers. It's apparent that PREA compliance is at the forefront of the facility's mission and goals, and their leadership is dedicated to staff and inmate safety.

The facility's policy, 12.004.1, Prison Rape Elimination Act specifies zero tolerance of sexual abuse and harassment. The agency policy outlines the agency approach to preventing, detecting and responding to sexual abuse and sexual harassment. Interviews with both inmates and staff confirm that the policy is in practice and sexual safety is taken very seriously at ACCF. According to documentation provided and interviews with the facility leadership, the determination was made that this facility does not contract with other facilities to house inmates assigned to their custody. Per the agency's contract with MDOC, which is through the confinement of inmates designated to ACCF, inmates will only be returned to the MDOC for housing. Therefore, ACCF does not contract for the confinement of inmates. This standard was found to meet standards, although contracting for inmates is not applicable to ACCF.

Auditor reviewed all aspects of the staffing plan prior to site review. During the onsite visit, the plan was discussed with the Warden and it is noted that all aspects of the standard are considered when developing and reviewing the staffing plan. The facility has documented any deviations from the staffing plan. Any time the plan is not followed, the Chief of Security is notified, and it is documented. Shift rosters are reviewed daily to monitor shift coverage. The plan is reviewed annually by the senior members of the staff to include the PREA Compliance Manager and any recommendations are sent to the MDOC PREA Coordinator. In addition to facility staff review annually, the departmental PREA Coordinator also reviews the staffing plan. Intermediate and higher-level staff are required by facility policy to conduct and document unannounced rounds. This process was verified through inmate and staff interview as well as facility register logs.

The facility utilizes two 12 hour shifts consisting of security and supervisory staff in addition to 24 hours of extensive video monitoring. The video monitoring has a 90 day retention to allow for review of any alleged incidents reported. Each area of the facility was evaluated to determine any blind spots prior to the opening in 2011.

Policy covers the procedures for searches and is compliant with the mandates of this standard. This facility does not house female or youthful offenders. The facility does not conduct cross-gender strip searches and/or cross-gender body cavity searches, and this was verified through staff and inmate interviews. Appropriate policies and training curriculums are in place to address cross-gender searches. There have been no exigent circumstances of cross-gender searching, but policies to address this, are in place as well. Training records/transcripts and staff interviews, confirmed that staff is receiving all training related to cross-gender searching, and the importance of the need for thorough documentation is prevalent. Established policies prohibit staff from searching or physically examining a transgender or intersex inmate for the sole purpose of determining the inmate's actual genital status.

During the interview process, it was noted that staff acknowledged receiving training on conducting cross gender pat down searches.

Cameras are strategically located through-out the facility to ensure inmate privacy, while maintaining a secure environment. Staff of opposite sex are required to announce their presence prior to entering housing areas, and this was observed during the tour. These announcements are common based on information gathered during interviews. Although there have been not transgender inmates at the facility, applicable policies are in place and training records indicate that staff are familiar with searching procedures with this population. Barriers in

the toilet areas and in the shower area allow for inmate privacy, while not infringing upon good security practices. Lastly, interviews with inmates revealed no concerns with cross-gender viewing during shower and/or bathroom use.

The toilet area is located toward the front of the open dormitory; however, a privacy barrier was installed and each stall has a closure attachment to added privacy. During the interview process, there were no concerns relating to cross gender viewing during showering or toilet use. The facility does not house female inmates.

There have been no major modifications during this reporting period. During the interview with the Warden, he indicated that all areas of the facility are reviewed annually to ensure camera placement is appropriate and designed to increase and enhance the facility's sexual safety. When preparing to reopen, the facility reviewed all areas including blind spots to determine the need for additional camera coverage. The changes were planned in detail, are very well executed and have been very well-received by inmates. The video monitoring system installed has the clarity to monitor activities within the housing zones and other facility areas with clear lines of sight and coverage. The Control Center Officer has access and is assigned to monitor the 46 cameras. Staff as well as inmates confirmed during interviews that they felt safe and secure with the camera system. During the site review, it was obvious that almost every area of the facility can be viewed while still enabling the privacy of the inmates while dressing, showering and toileting.

There have been no allegations of sexual abuse or harassment in the past 12 months.

Agency policy mandates immediate initiation of an investigation following an allegation of sexual assault. The policy states the agency shall follow a uniform evidence protocol when conducting the investigation.

This standard was addressed in ACCF policy, the PAQ, and during an interview with the investigative staff. All allegations of sexual abuse and sexual harassment reported by inmates, staff, third party, volunteers and/or contractors must be submitted to the proper investigative staff for investigation. All requirements of the standard are outlined in the policy published on the Mississippi Department of Corrections website as required.

The interview with the investigator indicated the Sheriff's office and the facility work together to maintain compliance with this standard, especially as they both are part of the Sheriff's Department. The investigator indicated he would be notified immediately and would follow alleged victim to Magnolia Regional Hospital to initiate investigation as soon as possible. Prior to the onsite portion of the audit, the auditor reviewed the training curriculum in addition to employee training rosters. While onsite, the audit reviewed additional rosters indicative of all staff completing the agency required training.

All full and part time staff at ACCF receive PREA training upon being hired, as well as annual refresher courses on the specifics outlined in this standard, in addition to first responder training. All staff have received the required annual refresher training, during the last twelve months. It is apparent, based on interviews and documentation reviews, that staff receive initial PREA training and are aware of their responsibilities and role in preventing sexual abuse and harassment incidents, in addition to appropriate evidence collection requirements. All training is tailored based on the all-male inmate population and documentation reviews reveal that staff understand the training that is received. Documentation reviews also reveal that training records and staff training transcripts are maintained in the appropriate human resources individual/facility files on site.

Before arriving at ACCF, all inmates are required to receive the PREA-required education and information concerning sexual safety to include reporting, response and retaliation. The information is provided at the MDOC Reception Center and the training/education is documented in the MDOC electronic inmate files.

During intake process at ACCF, inmates receive information explaining the zero-tolerance policy and how to report incidents or suspicions of sexual abuse or harassment. Much of this information is also provided by the Case Manager in a pamphlet format at Intake. The Case Manager and the Nursing staff are both involved in the intake assessment to determine risk for victimization. Upon arrival, every inmate has already completed the detailed assessment at the reception unit and are reassessed when they arrive to ACCF. To date, the facility has not received any inmates designated as high risk for sexual victimization, per the reception assessment.

There are adequate postings and signage strategically located throughout the facility, readily and continuously available in English and Spanish if needed. Random inmate interviews indicated that inmates have knowledge of PREA as well as acknowledgement receiving the education at the Reception Unit prior to arriving at ACCF.

Normally, ACCF does not receive inmates who have limited English proficiency, or who are deaf, visually impaired or otherwise disabled. If it was determined that a newly arrived inmate had significant disabilities, staff are available to personally assist with accessing services through MDOC or Contra Crisis Center. Generally, these inmates would be immediately transferred to the Mississippi State Prison at Parchman for confinement and care.

Upon review of inmate files, training curriculum, inmate handbook and PREA pamphlet, it is determined that the facility meets each subsection of this standard. The inmates are receiving PREA education and their Handbook upon arrival to the facility at intake. The auditor reviewed signed copies of documents in inmate case management files indicating they have received these PREA pamphlets and information and understand what information they have been provided. During interviews, it was evident the facility is providing ample education to each offender upon arrival and throughout the duration of the incarceration.

At ACCF, the Warden is identified as the Lead Investigator, with the Chief of Security also qualified to conduct investigations. Facility policy, training curriculum records and interviews reveal that the investigative staff receive not only the generalized training that other staff receive, but also specialized training in conducting investigations in a confinement setting. Both administrators are certified law enforcement officers of Alcorn County Sheriff's Department, and both have received extensive training relevant to sexual related crimes and investigations thereof. Examples of this specific training received are: interviewing sexual abuse victims, proper use of Miranda and Garrity warnings, sexual abuse evidence collections in a confined setting, and the criteria and evidence required to substantiate a case for administrative action and/or prosecution referral. All training documentation is maintained by the facility and it is noted that the training received exceeds requirements for this standard. Both individuals are extremely knowledgeable of the investigative process and their level of expertise in investigations is very beneficial to this facility.

Mental Health Services are provided through the Mississippi Department of Corrections, not in an RCF, and an offender requiring such services would be transferred back into the State prison system. Any inmate in need of mental health services would be transferred on an emergent basis and would have the possibility of returning, depending on the reason for transfer.

Per the organizational chart, two medical staff are employed at ACCF. Both have received appropriate training on how to detect and assess signs of sexual abuse and sexual harassment; how to preserve physical evidence of sexual abuse, how to respond effectively and professionally to victims of sexual abuse and harassment. There are no forensic examinations conducted at ACCF.

The PAQ reports 328 inmates entered the facility within the last 12 months and all were screened for risk of victimization and abusiveness upon their arrival. The inmate is screened upon arrival by the Case Manager. As required by the policy and standard, all inmates are screened upon intake at the regional MDOC Reception Facility for their risk of being sexually abused by other inmates or being sexually abusive toward other inmates; they also receive their first reassessment there since they are normally there several months. The screening assessment considers whether the inmate has a mental, physical, or developmental disability, age, build, previous incarceration, prior sex offenses, criminal history, previous victimization, and whether the inmate is detained solely for civil immigration purposes. Any inmates identified by the assessment are retained in MDOC and not sent to an RCF.

Policy prohibits inmates from being disciplined for refusing to answer assessment questions, or for not providing information in response to the screening tool questions. All information is secured appropriately on a limited access bases, with sensitive information strictly off limits to line staff or other inmates. Information gathered during the assessment, is privileged to staff making housing, work, or program assignments. At any time an inmate feels unsafe for any reason, he has the option to complete a Red Flag form that will ensure he is no longer housed with the inmate he is avoiding. This information is made a part of his permanent record, easily accessible if he transfers to another facility within MDOC.

In addition to the assessments by the Reception Center staff, the RCF Case Manager meets with every offender upon arrival and every thirty days, thereafter. Screening is accomplished promptly, within the first seventy-two hours after arriving. In accordance with applicable policies and standards, the reassessment tool considers prior data, along with any new information that may have been received.

Based on policy mandates and confirmed through staff interviews, ACCF accumulates information learned during the intake process, along with information gathered during the initial risk screening at the Reception Center and has done this for all 328 inmates received during the past year.

If there was an inmate that is identified as high risk either during intake or through nurses screening, the senior staff would be notified and an individualized determination of how to ensure the safety of each inmate would be decided. The facility can opt to either transfer the inmate back to the state facility or separate in housing and work assignments. In addition, the Cell Bed Assignment sheet is utilized to determine appropriate housing, work assignment, etc. Any information relative to the inmates high risk for victimization or predatory behavior will be considered when completing the Cell Bed Assignment form.

Typically, transgender or intersex inmates are not assigned here but reside at a state institution with more resources for housing and programming to ensure these inmates' health and safety. In the event that a transgender or intersex would be assigned to ACCF, policy states that all assignments would be reassessed twice yearly to review safety, with the inmate's own views of safety given serious consideration and this understanding. This information was verified through interviews with upper management staff. Although the facility has not received transgender or intersex inmates, facility policy provides the opportunity to shower separately from other inmates and facility staff were familiar with this requirement.

There were no instances of use of involuntary segregated housing in the past 12 months for inmates at risk of sexual victimization. ACCF policy does outline procedures to ensure inmates at risk of sexual victimization are not placed in involuntary segregated housing unless an assessment of all available alternatives has been made. Although there have been no incidents or allegations at this facility in the past 12 months, staff interviewed were aware of the requirements of the standard as well as the facility policy.

Involuntary segregation is rarely used at an RCF. Inmates placed in involuntary segregation do not ordinarily remain for more than 24 hours pending transfer. Reviewing practices and interviewing inmates indicated the policy was being followed.

There are several different avenues provided to the inmate population for reporting purposes. These services include mail, free telephone services to internal offices and external agencies, and directly to any staff member or third party who may report back to the facility. Staff is readily available to the inmate population to receive any complaints. According to policy, any staff member receiving a report is required to verbally report that immediately and provide a written report prior to the end of that shift. All interviews with staff indicated this procedure is understood and would be followed in the event of an allegation. The information for the external agency is posted throughout the facility and listed in the inmate handbook; all inmates interviewed were aware of the telephone number posting. Inmates may remain anonymous by using the external agency or by submitting an anonymous letter. Staff knew the methods to report and all interviews stated that they would be comfortable doing so. The agency allows third parties to submit reports of allegations of sexual abuse/harassment on behalf of inmates. Inmates are given the following information: S.A.F.E. Inc, P.O. Box 985 Tupelo, MS 388802 and MDOC PREA Tip Line 1-800-527-7233. There is a signed agreement between the Sheriff and the Warden indicating both parties are in agreement to abide by the PREA standards and cooperate with criminal investigations.

ACCF is not exempt from this standard and has procedures in place to address inmate grievances regarding sexual abuse. However, there have been no reports of sexual abuse or sexual harassment. Therefore, no grievances have been filed. ACCF policy addresses the administrative remedy process to be utilized. ACCF is required by the MDOC to forward all inmate grievances to MDOC for acceptance and review. MDOC will then provide response to ACCF. The procedure for filing a grievance is located in the inmate handbook and the agency policy. There is no designated time limit in which a grievance can be filed regarding an allegation of sexual abuse, harassment or retaliation. ACCF policy prohibits the grievance of sexual abuse to be submitted to or referred to the subject of the complaint.

The agency maintains a state wide agreement with rape crisis centers throughout the state to address emergent and crisis centered issues. All contacts are confidential. The facility provides the inmate population with access to outside victim advocates for emotional support services related to sexual abuse through the Mississippi Coalition Against Sexual Abuse by way of a Memorandum of Understanding with MDOC. Auditor observed the postings and confirmed knowledge of the information in the Inmate Random interviews. Auditor also contacted MCASA to confirm the requirements of the MOU.

Mailing addresses and toll-free hotline numbers are provided to the inmate population. Outside and third-party reports can be sent to the advocate office and can be completely confidential. Information or requests can be received by mail or telephone. No identifying information is required for the office to act and become involved in an alleged incident or need to provide direct service to the inmate.

The PAQ indicates that there have been no reports, no requests for advocacy, and no incidents occurring at ACCF in the past year. All inmates interviewed were knowledgeable about hotline and it is readily visible in all housing units.

During interviews, staff were aware of the steps to take to protect an inmate as well as their required first responder procedures and staff voiced their genuine commitment to this requirement. They indicated they would enforce it personally and believed that other staff also agreed with this approach.

The PAQ indicated there have been no reports where it was determined an inmate was subject to imminent sexual abuse. No reports were confirmed by the Agency Head or the Chief of Security. No staff interviewed could recall any sexual incidents in recent past. Extensive training concerning this topic was evident throughout all interviews at the facility. Random questions to staff during the site review gave the same results and that they were aware of the steps and processes required.

If necessary, in order to protect an inmate, ACCF can transport predatorial inmates to an MDOC parent facility where more housing and treatment options would be available if needed.

Typically, an inmate would be transferred to a state MDOC facility for housing to ensure safety if necessary. Policy states that if segregation is used, it will be short term and will include programming and privileges. The use of segregation relative to PREA would only be used as a final alternative and would only be implemented for safety purposes. Interviews with the Warden, Chief of Security and PREA Compliance Managers confirmed this procedure and understanding of the policy.

At ACCF there have been no inmates placed in involuntary segregation for protection following an allegation of sexual abuse during the last 12 months.

There have been no investigations or Incident Reviews in the past 12 months.

According to facility policy, ACCF requires a sexual abuse incident review within 30 days of the conclusion of every sexual abuse investigation. This review also includes those where the allegation has not been substantiated, and no review if the allegation has been determined to be unfounded. The review team includes the Warden and Chief of Security, PREA Compliance Manager and Nursing staff. Although, there have been no incidents to review, the facility exceeds the requirement with the procedure in place to review the incident. The facility utilizes a detailed review checklist that includes a summary of incident, response time, safety for inmate, policy and procedure review, reporting response, time frames of such reports, process review of incident. Each section has detailed requirements for data entry in addition to the recommended improvements. It is evident based on the review process that ACCF is dedicated to evaluating all aspects of the event to determine how to prevent sexual assault.

During the interviews with the PREA Compliance Manager and Nursing staff it was understood that both disciplines would participate in the review meetings and all parties indicated understanding of reasoning behind the meetings.
